2002

1. Kumari K, Tlapak-Simmons VL, Baggenstoss BA, Weigel PH. The streptococcal hyaluronan synthases are inhibited by sulphydryl modifying reagents but conserved cysteine residues are not essential for enzyme function. J. Biol. Chem. 2002; 277:13943-13951.

6. Duff B, Weigel JA, Bourne P, Weigel PH, McGary CT. Endothelium in hepatic cavernous hemangiomas does not express HARE. Human Pathol.2002; 33:265-269. [this article was selected for the cover of this issue]

10. Yik JHN, Saxena A, Weigel PH. The minor subunit splice variants, H2b and H2c, of the human asialoglycoprotein receptor are present with the major subunit H1 in different hetero-oligomeric receptor complexes. J. Biol. Chem.2002; 277:23076-23083.

12. Yik JHN, Weigel PH. The position of cysteine relative to the transmembrane domain is critical for palmitoylation of H1, the major subunit of the human asialoglycoprotein receptor. J. Biol. Chem. 2002; 277:47305-47312.
