COURSE DESCRIPTION AND PURPOSE:
This activity is designed to foster improvements in physician knowledge, competence and performance in general pediatrics sports medicine by exploring what constitutes ideal evidence-based practice and applying that ideal across varied health care arenas. This fast-paced course will augment the traditional lecture format with expert panel discussions and breakout sessions to enhance knowledge base and skill set. Audience response systems will provide participants with immediate feedback, allowing the opportunity to reinforce comprehension and retention of key learning objectives. The course combines the latest in evidence-based medicine and best-practice strategies relevant to the topics being addressed. A full syllabus of educational materials will be provided online as a resource for those practitioners caring for pediatric patients participating in sports.

INTENDED/TARGET AUDIENCE:
Pediatricians and family medicine practitioners
